Candy,

Page 29 still contains the following wording:

"Groundwater Monitoring Plan Sixty days after completion of the construction of the on-site containment cell, Respondents shall submit to EPA a Groundwater Monitoring Plan for the cell that takes into consideration the requirements of 40 CFR 264 subpart F."

I still consider submittal of the plan 60 days after the completion of the construction of the cell and merely taking into consideration the requirements of 40 CFR 264, Subpart F inadequate.

Terri
